

Products > Veterinary Products/ **Deltamethrin**

Description	:	Deltamethrin is a pyrethroid insecticide that kills insects on contact and through ingestion. It is used topically for the control of ectoparasites in cattle and sheep. It is also used in fin fish to treat sea lice. It is a new generation synthetic pyrethroids used in animal health, in vector control and in public health apart from use in crop protection.
Chemical Name	:	(S)- $\alpha$ -cyano-3-phenoxybenzyl (1R, 3R)-3-(2, 2-dibromovinyl) -2, 2-dimethylcyclopropanecarboxylate
CAS Registry No.	:	[52918-63-5]
UN No.	:	3349
IMDG	:	Class 6.1 (Pyrethroid Pesticide, Solid, Toxic)
Structure	:	

Specification: The Product conforms to BP Vet.

Description	:	White to buff colored crystalline powder
Assay	:	97.0 – 101.0 % w/w min.
Related substances	:	3 % w/w max
Residual solvent	:	limits in compliance to VICH GL18

DMF Numbers:

115 (BVL Germany)  
0512 (Veterinary Medicines Board, UK)  
11430003 (Irish Medicines Board, Ireland)

Shelf Life : Two years under normal storage conditions.

Packaging : 25 kg in UN approved Fibre board drums with LDPE liner
