

# GHARDA CHEMICALS LIMITED

## ENERGY POLICY

Gharda Chemicals Limited (GCL) is committed to make efficient use of energy at its all facilities and locations during its activities, in line with our commitment towards Responsible Care and Sustainable Development. We believe in preserving natural resources, reducing atmospheric emissions and contributing to mitigate the effects of climate change:

- a) GCL is committed to preserve and optimize the use of natural resources & energy and reduce atmospheric emissions due to the use of energy sources by incorporating efficient technology and good operational & maintenance practices.
- b) GCL shall use this policy as a framework for setting and reviewing energy objectives and targets in order to improve energy performance and reduce the relevant energy sources used in all its activities including products and services.
- c) In order to achieve set objectives and energy targets, GCL management is committed to ensure the availability of the necessary information and resources.
- d) GCL shall satisfy applicable legal requirement and other requirements related to energy efficiency, use and consumption.
- e) GCL shall support design activities for improvement in energy performance. GCL shall support the procurement of energy-efficient products & services that impact energy performance and encourage the use of renewable energy.
- f) In order to promote greater awareness among all of its stakeholders, GCL shall provide them reliable information regarding its energy consumption, its corresponding greenhouse gas emissions and the improvement actions undertaken.
- g) GCL shall be committed for continual improvement of energy performance and the Energy Management System.
- h) GCL shall ensure the training and development of employees and contractors for energy conservation. Setting up Energy management cell to monitor energy management programme & energy performance with regular audits.

This Policy is applicable to Gharda Chemicals Limited and its Subsidiaries and shall be reviewed periodically for its suitability and effectiveness.
