GUIDING PRINCIPLES

- To recognize and respond to community concerns about chemicals and our operations.
- To develop and produce chemicals that can be manufactured, transported, used and disposed of safely and securely.
- To make Environment, Health, Safety and Security considerations a priority in our planning for all existing and new products and processes.
- To report promptly to officials, employees, customers and the public, information on chemical-related health or environmental hazards and to recommend protective measures.
- To counsel customers on the safe and secure use, transportation and disposal of chemical products.
- To operate our plants and facilities in a manner that protects the Environment, Health, Safety and Security of our employees and the public.
- To extend knowledge by conducting or supporting research on Environment, Health, Safety and Security effects of our products, processes and waste materials.
- To work with others to resolve problems created by past handling and disposal of hazardous substances.
- To participate with government and others in creating responsible laws, regulations and standards to safeguard the community, workplace and environment.
- To promote the principles and practices of Responsible Care by sharing experiences and offering assistance to others who produce, handle, use, transport or dispose of chemicals.

SEVEN CODES OF MANAGEMENT PRACTICES
